

FrameGrip™

Structural Screw ICC ESR 4504

The FrameGrip™ structural screw from Levi's Building Components® is an excellent choice for a lag screw alternative. FrameGrip™ structural screws require no pre-drilling and can be used in both indoor and outdoor structural applications. The T-17 and Saw Thread allow for quick and easy drilling, while the U Thread creates added space to increase draw strength and reduce risk of wood splitting.

Bucket and Box Quantities

FrameGrip™

Bucket Quantities

Part#	Description	Head Style	Drill Pt	Pcs/Bucket	Lbs/Bucket
5163FGBU	5/16 x 3"	T30 star drive	T-17	500	17.7
