

A quality washer is vital to a long-lasting roof system and the DEKS name is known for long-lasting performance. Trust DEKS to offer an exceptionally durable washer which provides superior sealing and strength for metal to wood or metal to metal installations.

Available in a variety of size ranges, washers are clearly marked for easy identification. There is a size to suit every fastener and roof system.

- Sold in bags of 250
- Corrosion resistant aluminum
- Use under existing washer or remove existing washer
- Engineered load distribution - designed to minimize distortion
- Use with almost any #12 screw, metal to wood or metal to metal
- 19 mm diameter allows for pre-drilling and movement of the panel due to thermal expansion
- Recommended for use with polycarbonate skylight panels/side light panels (follow mfg. instructions for best results)
