

LoGrip™

LoGrip is a low profile, metal to wood roofing screw that has a refined appearance compared to the traditional hex head roofing screw. Features include T25 star drive, Hi-Lo threads, is mechanically galvanized for corrosion protection, and has an EPDM rubber washer that incorporates a secure seal. LoGrip provides a good grip to hold your metal roofing in place by having a type 17 point for easy penetration. This low-profile fastener is also available in 1" without a washer for interior liner panels.

LoGrip™
