

# Snow DEFENDER®

1500

The Snow Defender® 1500 is designed for use with an exposed fastener panel on 2 x 4 purlins in the upright position or on 2 x 4 purlins in the flat position. The 1500 has an EPDM rubber seal, so it makes for an effortless install - you only need the snow guards and screws, no extra caulk required. It's designed for narrow purlins or steel building Z's. The screw pattern allows for fastening into a purlin on edge. It also comes in 40+ colors so you are able to match any metal roof color needed.

EXCELLENT FADE RESISTANCE

DESIGNED FOR EXPOSED FASTENER PANEL APPLICATIONS

NO CAULK NEEDED
