

# SOLRSKIN

## RADIANT BARRIER UNDERLAYMENT

SOL-R-SKIN™ Composite is the first underlayment to combine the durability of synthetic roofing with the thermal performance of insulation. Patent-pending technology uses premium materials to protect your roof from the elements and help reduce energy consumption.

Made from 99% highly polished, scrim reinforced, aluminum bonded to fiberglass and synthetic underlayment, SOL-R-SKIN™ is reshaping what roofers expect from underlayment.
